The Lemuria 7 spaceship has been missing for over 70 years. Now it is back in the Solar System, however there are no crew members on it. It's also unclear how the Lemuria 7 has returned and why it has been seriously damaged.

In Lemuria: Lost in Space, you play as Abrix - the robot with AI that may operate in extreme temperatures, high levels of radiation and that yields weapon and hacking modules in order to explore the whole ship.

Abrix has an ability to overrun security systems. The unique hacking mini-game will challenge your math, geographic and logical thinking skills. There is no time to check Wikipedia - every mistake costs you valuable resources!

Abrix has a special software that allows him to upgrade himself during the mission. You need to be very careful - if you run out of batteries or an anti-radiation cloak, the mission is aborted and the game is over.

In order to explore over 100 rooms of the spaceship, you'll need to solve dozens of puzzles, find valuable resources for the robot and fight with security turrets and other enemies patrolling the ship.

Solving puzzles not only rewards you with priceless resources, but also uncovers the story of the lost crew of Lemuria 7. The level of challenge depends on difficulty - so choose wisely or you'll need to start from scratch.

Lame! I don't get people who like games like this.. I don't even need to say anything. It's Zuma and it's good.. This is really short, only about one hour long (if that) and it's just a bunch of dialogue and clearing waves of enemies (Literally waves. They tell you a number to clear and you clear them which progresses the dialogue for the storyline. There are no real cutscenes excluding the ending and the beginning. 3V10 would not buy again. Tailwind - <https://youtu.be/V-NB3zrT9cU>. It is a good game.

Pay for early in-game advantage with a high rate of fire handgun. Get the BSAA attachment which restores your health with each hit, and earns more battle points. So basically, pay real money for digital battle points.

Pay \$50 to get Jessica the waifu a digital lobster dinner while you're at it.

I only have this DLC because the Steam winter sale price of entire game was less than \$10. That depreciation though. Good things come to those who wait.. This is one of those games that I didn't really *get* when I first heard about it or saw it around and was probably going to skip it over, but heard more about it on the Voices of VR podcast so decided to give it a try and am really happy that I did. Simple, yet challenging and completely engrossing. Spent about a half hour playing and will definitely be going back trying to improve my score. Great amount of fun for the money.. This is an excellent and criminally overlooked roguelite. The use of hyperbolic space is truly unique and not just visual flair: it really impacts the gameplay and some crazy stuff is possible that wouldn't be in normal Euclidean space. The graphics are barebones and won't impress most, but considering this is a one-man labor of love I think they do a great job. Well worth the full price, but if you want to try it first, a slightly outdated version is offered free on the creator's site.. This game isn't really bad, but my gaming experience was worse because of bugs I stumbled upon. I won half of the levels because of those bugs, sometimes I lost just because of them. Think to die is not that expensive, though I would recommend getting it only while it is on sale.. Royal Defense is an enjoyable tower defence game that somewhat tries to be a Kingdom Rush clone. Although it's not as good as Kingdom Rush it's not a bad game.

Pros:

- nice graphics
- decent music
- DLC has as many levels as the main game
- each tower can be upgraded three times
- towers can be upgraded into special towers
- base settings of towers can be permanently upgraded by collecting gems
- higher difficulty makes the game more challenging
- some locations offer a further view
- some locations increase your attack power
- some locations need to be purchased with gems, which makes the game harder
- invisible enemies force you to build radar towers
- magic attacks that reload in time or can be purchased for gems
- option to pause
- add or upgrade towers in pause mode
- call magical attack in pause mode
- two times speed
- some enemies are immune to certain type of attacks, which enriches the strategy level
- walking and flying enemies
- enemy magicians can temporarily deactivate your towers
- some enemies produce new enemies
- option to manually direct fire on a specific enemy

Neutral:

- fixed tower locations
- only four type of towers (arrow, cannon, mortar, money tower)

Cons:

- DLC is better than the main game
- repetitive gameplay, most of the time you can stick with the same tactics
- gems appear randomly
- no option to reset tower abilities you already purchased
- no in-game opponents wiki
- no in-game tower wiki. Very addictive and fun. I love the quotes given for the elements, they add a lot of humour to the game.. This game legit used to be my life, every day after primary school everyone would go home and a select few with late working parents went to what we called 'club' at club we had food played football and played ps1, that's all we did, it was amazing ;-;

This was the only game I played on the ps1 and it's so nostalgic seeing it again <3. I was kinda dreading starting this game. I got in in a bundle with the Secret Files series, which turned out to be quite underwhelming, and I didn't want to go through the same thing. But I was (thankfully) so wrong!

The story centers around Fenton Paddock, our protagonist. With a name fit for a rascal, he appears quite flippant but not in an offensive way due to his copious amount of boyish charm. The rest of the cast is also interesting, each with a rich backstory and distinct motivations. And the voice acting is spot on!

But the great beauty of this game is the sense of adventure it exudes. The progression of the story makes so much sense and the places you go (or end up) are diverse, beautifully crafted and presented, with an almost magical allure; from the Governor's mansion in Hong Kong, to the Himalayas and the streets of Marrakech. The various maps of each area are a nice touch, adding to the game's adventurous nature.

Playing this game has been an absolute delight!

Whole-heartedly recommended!. I bought this here because I found out I could. It's cheap as ♥♥♥♥, and it's amazing, and if play D&D you will love this. It's witty and punny and great and corny. I love this stuff.. game crashes after some time randomly and neither saves load on this damned game in w7
